- CME Group, which processes millions of transactions per day, found that running Sun Solaris on SPARC servers had become too costly to sustain.

- CME migrated to Red Hat Enterprise Linux on x86 servers. In the first year of production, the new system delivered a twofold increase in performance and reduced costs by 50%. Now, 99% of CME's distributed platform runs on Red Hat Enterprise Linux.

- Recently, CME upgraded to Red Hat Enterprise Linux 7, and the company is excited about the release's container technology for enhancing CME's internal cloud capabilities.

FINANCIAL INDUSTRY

"We want to get into a faster pace of adopting upstream features, and Red Hat Enterprise Linux 7 brings us capabilities that we are very interested in, like containers and Docker... We've been with Red Hat for the last 10 years because they have provided value, and we expect that relationship to continue with Red Hat Enterprise Linux 7."

VINOD KUTTY, SENIOR DIRECTOR, ENTERPRISE SERVER PLATFORMS, CME GROUP
