# Red Hat Upgrades Enterprise Infrastructure-as-a-Service Offering with Red Hat Enterprise Linux OpenStack Platform 6

Co-engineered with Red Hat Enterprise Linux 7 to enable open cloud infrastructure for enterprise businesses and service providers deploying OpenStack

[CONTACT RED HAT PR ▶](#) [RSS](#)

**RALEIGH, N.C. – February 17, 2015** – Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the general availability of Red Hat Enterprise Linux OpenStack Platform 6, featuring updates designed to serve as the foundation for building OpenStack-powered clouds for enterprise businesses with advanced cloud users, telecommunications companies, Internet service providers (ISPs), and public cloud hosting providers.

“Nokia Networks is defining requires for the operators’ datacenter architecture to be able to meet the needs of virtualized network functions. In collaboration with Red Hat, we have been working to prioritize the NFV infrastructure features that will now become available in Red Hat Enterprise Linux OpenStack Platform 6. Nokia

## PRESS RELEASE

# Red Hat Launches Red Hat Enterprise Virtualization 3.5 with Increased Scalability, Management, and Integration with OpenStack

## Red Hat Enterprise Virtualization offers the ideal platform for both traditional and cloud-enabled workloads

### IN SHORT

Red Hat today announced the general availability of Red Hat Enterprise Virtualization 3.5, enabling organizations to deploy an IT infrastructure that services traditional virtualization workloads while creating an enterprise-grade foundation for cloud infrastructure.

Red Hat Enterprise Virtualization

RALEIGH, N.C. – February 11, 2015 – **RALEIGH, N.C. - FEBRUARY 11, 2015** - Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced the general availability of Red Hat Enterprise Virtualization 3.5, enabling organizations to deploy an IT infrastructure that services traditional virtualization workloads while creating an enterprise-grade foundation for cloud infrastructure. Red Hat Enterprise Virtualization 3.5 delivers standardized services for mission critical workloads, and offers IT organizations greater visibility into provisioning, configuring and monitoring of their virtualization infrastructure, all based on open standards.

*“The healthcare industry is undergoing significant changes that require us to rapidly adopt to new business and regulatory compliance requirements. Because Red Hat Enterprise Virtualization is built on open standards that enable flexibility and fast innovation, we can more quickly adopt our IT infrastructure and*

# Évènements à venir

# Red Hat Convergence – Montréal – 14 mai 2015

**RED HAT<sup>®</sup>  
CUSTOMER CONVERGENCE EVENT SERIES**

## Red Hat Customer Convergence Event Series

A Red Hat Customer Convergence Event is a complimentary one-day gathering for Red Hat subscribers to learn from and collaborate with the Red Hat experts who write and support the applications that your business runs on. Each event is a unique opportunity for you to ask your questions in a small group setting directly to the experts who create and work on the products you use every day.

If you are interested in attending a current event or are interested in having an event run in your area, please email us at [rhcc@redhat.com](mailto:rhcc@redhat.com).
