PRESS RELEASE

Red Hat to Acquire eNovance, a Leader in OpenStack Integration Services

Addition of eNovance deepens Red Hat's OpenStack technical expertise

IN SHORT

Combined with Red Hat's existing leadership in OpenStack, the addition of eNovance's systems

RALEIGH, N.C. – June 18, 2014 – Red Hat, Inc. (NYSE: RHT), the world's leading provider of open source solutions, today announced that it has signed a definitive agreement to acquire eNovance, a leading provider of open source cloud computing services. Combined with Red Hat's existing leadership in OpenStack, the addition of eNovance's systems integration capabilities and engineering talent is aimed at meeting growing demand for enterprise OpenStack consulting, design and deployment.

Red Hat acquires FeedHenry

FeedHenry brings mobile application services to OpenShift by Red Hat and Red Hat JBoss Middleware

Enterprise applications are at the heart of today’s organizations, orchestrating and influencing all aspects of the business. Our goal is to help enterprises get applications to market faster by providing them with the best tools to develop and deploy exceptional offerings for their customers. Earlier this year, we previewed the next versions of our [application platform](#) and [high-performance data grid](#) technologies. These are two great examples of platforms that give organizations the ability to create new business value for customers, support new cloud architectures and deployment patterns, and reinvent systems of engagement.

Today, both [Red Hat JBoss Enterprise Application Platform \(JBoss EAP\) 6.3](#) and [Red Hat JBoss Data Grid 6.3](#) are generally available for current customers or members of the JBoss Developer community to [download](#). These technologies allow organizations to accelerate time to market and deliver new innovation—while also providing what they need to maintain, upgrade, and secure their applications while in production. They provide agility and flexibility for development and performance, and availability, security, and reliability for production, upgrades,

Bonjour a tous!
Hier je devais cloner deux base channels et leurs 7 enfants; je me sentais paresseux et donc j'ai trouvé un API et une série de scripts sur GitHub qui sont pas mal du tout. Il y a des petits bugs mineurs, mais les tests que j'ai ...
