Learning about open source in 2020.

Matt Broberg
@mbroberg

opensource.com

10 year anniversary

Hi, I'm Matt

Technical Editor for Opensource.com
&
Student in "The Business of Open
Source" at **Brandeis University**

The logo for opensource.com features the text "opensource.com" in a white, lowercase, sans-serif font, centered within a dark blue rectangular background. Below the text is a green ribbon-like banner with the text "10 year anniversary" in a white, lowercase, sans-serif font.

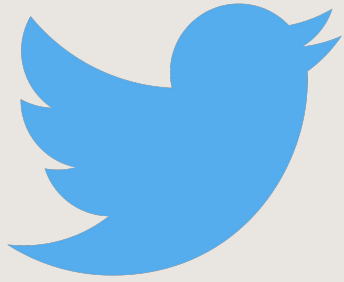

opensource.com

10 year anniversary

1. Daily publication with over 2 million articles read a month
2. Publishing articles on anything with a strong open source story
3. Staff available to coach authors on telling great stories
4. Top articles in Linux, Python, Rust, Kubernetes, and open source news
5. An ever-evolving community of active participants

Hard to see outside the
bubble

Knowledge with points!

`tour` is not installed by default with an installation of go. You need to `go get` it:

68

```
go get golang.org/x/tour/gotour
```

Docs: <https://github.com/golang/tour/>

19 ▲ After installing that, I found `gotour` inside my `$GOPATH/bin`, and I could run it manually e.g. `./gotour`. But `go tool tour` still doesn't work for some reason. Something wrong with my path maybe? – [Prashanth Chandra](#) Jan 22 '16 at 3:12

8 ▲ Nevermind, I can see that the package was supposed to be run like that, according to the README. – [Prashanth Chandra](#) Jan 22 '16 at 3:13 ✎
