**Proposed Feature Set (\* Subject to change without notice)**

# SOUTHBOUND – ANSIBLE MODULE

## Proposed Feature Set (\* Subject to change without notice)

### Change Management:

- Create Change
- Create Change from Template
- Update Change (using Change ID)
- Update Change using sys id
- Get Change (using Change ID)
- Get Change using sys id
- Get Changes using a filter

### Incident Management:

- Create Incident
- Create Incident from Template
- Update Incident (using Incident ID)
- Update Incident using sys id
- Get Incident (using Incident ID)
- Get Incident using sys id
- Get Incidents using a filter

### Problem Management:

- Create Problem
- Create Problem from Template
- Update Problem (using Problem ID)
- Update Problem using sys id
- Get Problem (using Problem ID)
- Get Problem using sys id
- Get Problems using a filter

### Configuration Item Management

- Create CI
- Get CI (using CI Name)
- Get CI using sys id
- Update CI (using CI name)
- Update CI using sys id
- Get CIs using a filter

### Configuration Item Relationship Mgmt

- Create CI Relationship
- List CI Relationships
- Get CI Relationship using sys id
- Update CI Relationship using sys id
- List CI Relationship Types
- Get CI relationships using a filter

### Generic Service / Record Transaction Management

- Create Record
- Read Record
- Update Record
- Delete Record
