# SUMMIT

## Deploying Autofs

Jeff Moyer <[jmoyer@redhat.com](mailto:jmoyer@redhat.com)>

# Autofs Eases Administration

- Uses existing directory services
- Unified file system layout
- Add storage with no configuration!

# Improved Reliability

- Only mount what is needed
- Replicated servers

# Configuration Basics

- Master map
- Mount maps
- Map sources

# Deploying Autofs v4 – What's Different?

- Master map
- Map options
- Direct maps
- Replicated servers

# Linux-Specific Features

- Program maps
- Multi-maps
- Map source override
- Hesiod support

# Autofs v5

Goal: 100% compatibility
